Options for doing electrical.

Note: need a permit from the city in any case to do the work. approx \$200.00

1. volunteer
kwartzlabs get permit, tell them that you have an electrician helping to do the work, and then with his help we do all the work. Hydro inspection is optional and based on the building owner.

permit \$200 approx.
materials \$800 to \$1000 for wire
panel \$200
conduit \$60
couplings \$25
100 amp breaker for panel feed \$100
10 hours @ \$40.00 = \$400.00

\$1785 - \$1985

done before christmas.

pay for materials first than after pay labour after.

we can run our own wire from our panel to where ever we need it.
